SUMMARY

Frontend Software Engineer with 6+ years of experience designing and building enterprise web applications using Next.js, React, and TypeScript. Experienced in developing scalable customer-facing platforms, operational systems, financial applications, and workflow automation solutions with a strong focus on frontend architecture, performance, maintainability, and user experience.

Comfortable working across the full stack using Node.js, REST APIs, CI/CD, and cloud-ready deployment workflows, enabling frontend solutions that integrate seamlessly with backend services and complex business processes.

EDUCATION

Bachelor's Degree in Information Technology (IT)

EXPERIENCE

Frontend Software Engineer

ISP Customer Self-Service Platform

Designed and developed a customer self-service platform serving 18,000+ active subscribers, enabling digital sales, service renewals, customer support, and customer engagement through a unified web application.

- Designed scalable SSR/PWA architecture using Next.js and React.
- Developed digital sales, renewal, support, and reporting workflows.
- Built a Web Push Notification platform with delivery tracking and analytics.
- Implemented loyalty programs, surveys, promotional campaigns, and recommendation features.
- Technologies: Next.js, React, TypeScript, React Query, Redux, Node.js, MySQL

Frontend Software Engineer

Enterprise Operations & Compliance Platform

Designed and developed an enterprise platform for operational monitoring, financial compliance, incident management, and workflow automation across technical and business departments.

- Financial Operations
- Developed a rule engine to validate operational and financial data against business policies.
- Built automated reconciliation workflows between internal financial records and banking transactions.
- Designed an incident management system that automatically initiated investigation workflows whenever inconsistencies were detected.
- Technical Operations
- Developed an internal field operations platform supporting service provisioning, fault management, feasibility assessments, equipment tracking, and operational coordination.
- Implemented operational forms, voice-based daily reporting, equipment checklists, machinery usage tracking, internal communication, and follow-up workflows.
- Technologies: Next.js, React, TypeScript, Node.js, PHP, MySQL

Frontend Software Engineer

Financial Transaction Processing & Tax Integration Platform

Designed and developed a transaction processing platform that automated submission, tracking, and lifecycle management of financial transactions integrated with Iran's National Tax System (Samaneh Moadian).

- Automated financial transaction submission through government tax APIs.
- Built end-to-end transaction tracking using unique tracking identifiers.

- Implemented monitoring, error reporting, and retry workflows for failed or pending transactions.
- Developed operational dashboards to improve transaction visibility and processing reliability.
- Technologies: Next.js, React, TypeScript, Node.js, REST APIs, MySQL

Frontend Software Engineer

Greenhouse Business Management Platform

Led the end-to-end design and development of a custom ERP solution supporting daily business operations.

- Designed the application architecture and relational database model.
- Developed integrated modules for sales, inventory, finance, logistics, and CRM.
- Built management dashboards and business reporting tools.
- Automated operational workflows to improve efficiency and data consistency.
- Technologies: PHP, MySQL, JavaScript, jQuery, Bootstrap

TECHNICAL SKILLS

Frontend: Next.js, React, TypeScript, JavaScript, React Query (TanStack Query), Redux, Zustand, Tailwind CSS, Ant Design

Backend: Node.js, REST APIs, Authentication & Authorization

Architecture: Frontend Architecture, Server-Side Rendering (SSR), Progressive Web Apps (PWA), Web Push Notifications

Databases: PostgreSQL, MySQL

CI/CD: GitHub Actions

Tools: Git, Docker

LANGUAGES

Persian — Native English — Professional Working Proficiency
